

THE COMPANY

“The Goldman Sachs Group, Inc. is a leading global financial institution that delivers a broad range of financial services across investment banking, securities, investment management and consumer banking to a large and diversified client base that includes corporations, financial institutions, governments and individuals.” [About Us](#)

THE OBJECTIVE

Data Source: [Inflation & Prices](#) data provided by the Bureau of Labor Statistics including Consumer, Producer, and International prices data.

Present key trends and findings of inflation and consumer prices and how you see these factors changing over the next few years

THE SCOPE

- Show through lens of pre and post pandemic
- How do you expect this forecast to impact different industry sectors including Banking & Capital Markets
- Think about the story you are trying to present in your charts and how quickly the information can be understood

STEPS

Retrieve and parse the data using text files or APIs provided on the Inflation & Prices data page.

The data is broken down into dimension and fact tables so thinking about how and on what keys to join the data will be important.

Parse through the time series and identify trends.

Visualize data using your preferred visualization tool and present your findings.
